Senior Full-stack Software Engineer

Technical stack: Java Kotlin React.js AngularJS Oracle PostgreSQL MSSQL Microservices Redis Kafka Docker Spring Ktor Jooq gRPC Parallel programming JavaScript

About me:

Hello! My name is Evgeniy and I'm a software engineer at Yandex. In 2005, I wrote my first professional program for the plane automated landing system as part of university project. Currently, I'm in charge of designing and implementing highly performing and scalable enterprise applications. I believe in writing code that is balanced, secure, and performs well.

Java Software Engineer
at [Yandex](#)

Sep 2022 – Present

Company size: Enterprise
Sector: Sales / Marketing

Participated in the design and development of a high-performance corporate CRM platform. As a lead developer integrated telephony services into CRM. This subsystem operates >10k calls per day with 99% uptime. It includes real time events processing service which automated many routine post-call scenarios. Later joined the team responsible for building next generation BPMN-compatible platform for sales automation. Designed and implemented effective data objects IO component, which made it simple to connect business process with external systems.

Technical Solutions Architect
at [Trade The News](#)

Mar 2014 – Mar 2019

Company size: Small
Sector: Financial and trading news

Acted as an independent technical consultant, helping the company develop technical solutions for marketing and sales departments. Initially was responsible for building feature rich corporate CRM system according to prevalent processes in sales and marketing. The CRM application includes among others: Marketing campaigns, Newsletter design, Landing pages, Online contracts, Payment gateway, Help desk. It helped significantly boost marketing outcome and increase sales up to 50%. Later switched to R&D team working on real-time news search and analytics engine. Implemented online collaborative news editor, which supports multi-user headlines editing. It increased the speed of news publishing and the value of the company.
